

Dear Senator Smith, Senator Klobuchar, and Congressman Emmer,

This letter is in regards to acquisition of funds for much needed road construction and flood mitigation in Sartell for many reasons. We have lived in the Wilds neighborhood of Sartell for 11 years. Every spring ice melt or an episode of heavy rainfall poses potential threats of flooding our homes and roads. In recent years, there was one 18 month period of time where we suffered three major flood events that resulted in outstanding and repeated property damage along with loss of access to several homes altogether. In addition, the quality of our neighborhood roadways have drastically deteriorated and they pose significant safety concerns due to high traffic usage. I chose to drive my younger children through our neighborhood to their friends' houses instead of letting them bike or walk due to safety concerns. Too many times it has been a close call on our road and one of our neighbors lost their dog in a traffic accident, by the grace of God, it wasn't a child. We need another route for traffic and the means to redirect water. The construction and expansion of 15th Street North in Sartell along with environmental water drainage would dramatically improve traffic flow and ideally alleviate the potential for flooding. Please fund this construction and flood mitigation project in Sartell.

With Gratitude for all you do,

Kris Lawrence
1536 Cougar Lane
Sartell, MN

Congressman Emmer, Senator Klobuchar, and Senator Smith,

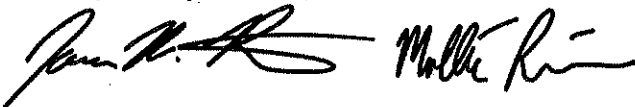

My family is reaching out to you for assistance. We built our home in Sartell, Minnesota in 2021. Due to the additional development around us we have had numerous issues occur, thus we are reaching out to you.

One concern is the flooding in our neighborhood which is occurring due to the increase of water flow directly through our city, which happens to pass through our backyard. On 3 occasions over the first 18 months we lived here, we had to take measures to prevent this excess water from coming into our home and our neighbors. On these 3 occasions the floods were labeled as 400- and 800- year events, again within 18 months of each other. We have had to set up last minute sandbags and outdoor pumps to try and reduce the water in the neighborhood. We have lost power during one of these events and water took over many of our neighbors homes. Our city desperately needs to direct a sizable portion of the water away from the city. Representative Tim O'Driscoll helped our community obtain funds to begin the process of water mitigation, however, we need your assistance to achieve completion of the diversion projects. I am told by our city leaders we need \$9 Million to implement a permanent solution.

Additional concerns are increased traffic on limited roadways. This is due to limited entry and exit points from our neighborhood and the adjoining neighborhoods. This is intensifying the deterioration impacting the roadways themselves and is making our neighborhood streets unsafe for children and families. We have had numerous vehicles use our neighborhood street as a main artery to drive between Pinecone Rd. North, and 19th Ave. North. Given the several schools which are in the immediate vicinity there have been instances of cars driving well above the posted speed limits which has posed a large safety concern for kids walking and biking to school, kids playing in the area, for pets, and for individuals out walking for exercise. Unfortunately, kids have been almost hit while riding their bikes and there have been instances of pets being hit and run over due to the high traffic on 13th Ave. North and on Grizzly Lane. This has been one of our greatest concerns with the area that we have built, and the main reason that we have **considered moving away** from the community we have joined. It would fix the deterioration of the roads and the safety concerns if we had further road development to lessen the burden.

The project I am referring to is 15th Street North. This will create east and west connections of 19th Ave N and Pinecone Rd N. This would not only significantly mitigate the flooding issue but improve the limited roadways and impact on the ones that currently exists. My wife and I believe that this project would also greatly increase the safety of our neighborhood streets as well. We appreciate your assistance in this matter as you can imagine the past 18 months have been stressful at the thought of our home flooding as well as road safety.

Thank you for your time,

Dear Congressman Emmer,

My name is Nick Kenning and I am a resident of Sartell, Minnesota. I am writing regarding our request for funding for 15th Street North construction. I reside in the Wilds neighborhood on Grizzly Lane. I have three small children and many families with small children live along this street in our neighborhood.

As you may be aware, Sartell has grown exponentially and our roads are inadequate to control East-West traffic between booming neighborhoods, schools, and businesses. This extra traffic is currently being absorbed by roads not designed to handle such traffic. Construction of 15th Street North, with your help with funding, will resolve many of the issues that residents of Sartell are facing. I will outline issues with the current situation below:

- Grizzly Lane is a narrow 2 lane residential road lined with families' houses on both sides. With the lack of a road like 15th Street North to adequately manage East-West traffic, this small road sees in excess of 2000 automobile passes daily. Stop signs installed by the city have not reduced this. I know of several pets which have been hit and killed on this road. An out of control vehicle ended up in my neighbor's front yard. Several mothers have expressed they feel unsafe walking with their families in the street. I have had to stop several drivers to inform them of reckless driving in front of my house. Construction of 15th Street North would move this traffic from our neighborhood to an appropriate roadway.

- Because of this increased traffic, the road quickly deteriorates and is lined with potholes which cannot be repaired fast enough.

- There is also a drainage issue which 15th Street North will alleviate. In the past 18 months there have been 3 major floods on Grizzly Lane due to this drainage issue. Over half of the basements flooded. There were carp swimming across the street multiple times. The road was shut down, further crippling the already compromised East-West traffic in Sartell.

Thank you for your time in reading our concerns and I appreciate your consideration in funding 15th Street North.

Nicholas Kenning

Congressman Emmer, Senator Klobuchar, and Senator Smith,

My family is reaching out to you for your assistance. We built our home in Sartell, MN in 2007. As time went on our city grew quickly. Due to the additional development around us we have had numerous issues come up, thus why we are reaching out for your assistance. Our greatest concern currently is the flooding which is occurring due to the dramatic increase of water flow directly through our city, which happens to pass through our backyard. On numerous occasions over the years, we have had to take measures to prevent this excess water from coming into our home. We have built an earth and block retaining wall, plug drains intermittently, and set up last minute sandbag and outdoor pumps to pump water back over the wall. If these pumps fail or we lose power, water will overtake our home. In the last 18 months we have had three major floods labeled as 400- and 800-year events, again, all within 18 months. Our city desperately needs to direct a sizable portion of the water away from the city. Representative Tim O'Driscoll helped our community obtain funds to begin the process of water mitigation, however, we need your assistance to achieve completion of the diversion projects. I was told by our city leaders we need \$9 Million to implement a permanent solution.

Additional concerns are increased traffic on limited roadways, thus intensifying the deterioration impacting the roadways themselves. We have limited entry and exit points from our neighborhoods necessitating the need for further road development to lessen these burdens.

The project to which I am referring is 15th Street North creating east and west connection of 19th Ave N and Pinecone Rd N. This would not only significantly mitigate the flooding issue but improve the limited roadways and intense impact on the ones that currently exists. We appreciate your assistance in this matter as you can imagine the past 18 months have been stressful at the thought of our home flooding.

RE: Letter of Support for the Sartell's 15th Street North Corridor

Dear Ms. Gruber:

In 2016, the Saint Cloud Area Planning Organization (APO) helped fund a corridor study for extending 15th Street North in Sartell from Pinecone Road to 30th Avenue North (sometimes also called "Townline Road").

The study demonstrated the value of the 15th Street corridor extension to help improve system-wide traffic flow in the City of Sartell, as well as providing needed infrastructure for the future growth of the City. The study also suggested phasing development of the corridor, with Phase 1 addressing more immediate needs, and Phase 2 addressing more longer-range needs.

Based on the need to improve system connectivity for current residents to the western side of the city and to help alleviate growing traffic congestion and safety concerns on existing roadways, Phase 1 to extend 15th Street North from Pinecone Road to 19th Avenue North was included in the APO's most recent Metropolitan Transportation Plan.

This letter affirms the APO's concurrence as to the value and necessity of the 15th Street North extension, and its eligibility to received Federal surface transportation funds.

Sincerely,

BRIAN GIBSON

Attn: Anna Gruber, Sartell City Administrator
Re: Lobbying for Additional Funding for 15th Street North Project

Hello Anna,

I understand that the City of Sartell will be applying for funding to help finance local city roadways for our community. Thank you so much for your attention to this and bringing this to our community's attention during our past neighborhood meetings. The City staff, including yourself, have done an excellent job educating our neighborhoods and community the past 18 months on how city roads and transportation improvement projects are funded and prioritized.

I write to you today, with the noted support of my neighbors, that we want to continue lobbying for additional funding to support improving our community's roads, specifically the 15th Street North Project. Taking advantage of available grant monies and other funding opportunities is critical for a community of our size to help make our roads and transportation avenues safer and more efficient.

As you know, our community is growing at a rapid pace. New beautiful neighborhoods are being developed and new families are moving in. Traffic is increasing at a rapid rate to get to the north side of town. This is due much in part due to the new Sartell High School, Oakridge Ridge Elementary, city parks/school district ball fields, expanding neighborhoods, Blackberry Ridge Public Golf Course and Pinecone Road North being used as a primary commuter road out of town for residents heading north on the weekends.

Below are a few bullet points that support why we believe improving our local neighborhood roads is critical for neighborhood safety. Specifically, why we believe that prioritizing the 15th Street North collector road is at the top of our priority list.

- **Traffic Volume Increase: Neighborhood roads not designed or intended to be collector roads are now serving that purpose** – Grizzly Lane and 13th Ave N are a couple examples of this. An increase in traffic to get to the north side of town and lack of side walks are creating very dangerous pedestrian safety situations. These two roads are serving as collector roads connecting large neighborhoods, many with new young drivers. We refuse to walk on our neighbor street (Grizzly Ln) or play in our front yard with our young children due to the danger Grizzly Lane traffic causes.
- **Poor Pavement Conditions: Neighborhood roads standard maintenance schedules are not enough** – Our neighborhood roads are in such poor condition due to potholes, large cracks/bumps, exposed sewer lines/manholes are disrupting regular traffic flow. This causes drivers to drive through our local roads as if they are driving through an obstacle course. Drives are distracted by poor road conditions opposed to pedestrian safety.

- **Lack of sidewalks/pedestrian right of ways** – Regional collector roads I understand should be capable of handling auto traffic but also pedestrian traffic as well. My assumption is that the 15th Street North collector road would have appropriate lighting and a walking path or sidewalk.
- **Travel time across town: North to South and East to West-** The City of Sartell needs larger collector routes that the obvious path of least resistance. Today's drivers seem to be more distracted and more in a hurry. Creating a regional collector road to accommodate a smooth and safer commute for drivers and pedestrians to alleviate risk in our neighborhood roads should be our top priority when planning and all road improvements.
- **Crashes and Minor Accidents: Increase in both and at risk for more severe** – The Sartell Police and Public Safety Department's analytics and metrics should be reviewed when prioritizing roadway projects. Central Park Boulevard and Pinecone Road North are the only east/west routes on the north side of town and the volume puts those roads at risk for being a cause for more accidents and pedestrians. Adding an additional regional collector road that runs east/west can lessen this risk. We have discussed in the past that public safety reports have gone up on the north side of town due to traffic violations or increased volume.

Thank you so much for taking the time to review these concerns that have been expressed in many of our neighborhood meetings, city hall meetings, HOA meetings and resident task force meetings. The below signed names are my own and my fellow Sartell residents and neighbors that share the same sentiment in this letter and all advocate for the City of Sartell to prioritize additional funding for the 15th Street North project. Our own, children and neighborhood safety depend on it. Thank you!

Best Regards,

Colin Anderson

To Whom It May Concern,

The City of Sartell is again pursuing funding that will help ensure the safety of pedestrians, bicyclists and motorists within our community. The funding is being sought for an area that would make an east to west connection within the community.

Currently the area in question funnels traffic on interior roadways that have a 30-mph speed limit and we receive numerous complaints of excessive speeding and poor driving in general on those roadways (13th Ave, 19th Ave and Grizzly Lane). The city has attempted some improvements on these roadways such as additional signage and/or striping to better delineate lane use which has had some minor improvement but not to the degree that an east/west connecting roadway constructed for that daily traffic flow would have.

The Sartell Police Department supports the City in its endeavor to extend 15th St. N from its current location. I know that this additional roadway will dramatically improve the safety of pedestrians, bicyclists and motorists alike.

Your assistance in moving the grant approval forward would be appreciated by many in our community, including the police department which is tasked with keeping both the motoring and pedestrian community safe.

Sincerely,

Jim Hughes
Chief of Police

Thursday, October 14, 2021

Office of Senator Tina Smith
Congressionally Designated Project Request

To Whom it May Concern:

LeSauc Township is aware of the City of Sartell's request for Congressional Designation for Project Funding for 15th Street North and is writing to provide our utmost support for the project. LeSauc Township strongly supports efforts to improve this roadway and encourages designation and funding for this crucial connection.

LeSauc Township borders the City of Sartell and 15th Street North is an important roadway that will connect a township road (often referred to as town-line road) to Pinecone Road in the City. We know the importance of making this connection for township residents, city residents, our school system, students, and future development.

Beyond the importance and high priority of the project, we know and understand that the likelihood of the construction of this road will not happen until we can secure funding. The City has committed funds to the project, but the overall project cost is simply too much for a township or city to bare alone. We encourage Congressional Designation of this vital project within the City of Sartell and LeSauc Township.

Respectfully,

Daniel J. Heim
LeSauc Town Board Chair

November 23, 2021

To Whom it May Concern,

First off, I wanted to thank you for your consideration of the City of Sartell as we pursue a grant for the 15th Street N. project. As I have only been with Sartell for just under a year, it has been very apparent that we have entered a rapid growth phase in our community as it is highly sought after for its excellent schools, cleanliness, and small-town feel. With this, we are experiencing many challenges as we seek to continue to provide high-quality public safety to our residents.

Sartell's growth seems to follow our main north/south corridor Pinecone Road in which our new Public Safety Facility is located on. We currently have limited routes that connect the city from east to west and especially to the rapidly developing area to the west. As Fire Chief my primary concern has always been to provide a "high-quality, well-trained crew in a timely manner". There are many factors that effect that outcome from staffing to location and many others. As a paid-on call fire department we are already minutes behind when responding to fires and other emergencies and I have always preached to our crews to take the least residential route possible as appropriate to get to the call. This is an extremely important factor in providing a safe response. The residents that live in the northwest corner of our community continually come to the city council meeting to address their safety and traffic concerns related to their neighborhoods as they have become inundated with traffic from the growing developments in the area. As Fire Chief I cringe when we are dispatched to any residence in this area as I know we will be responding through a highly residential area with many curious children; always balancing a need for a quick response with the public's safety.

The addition of 15th Street N. is a high priority to the city and a high priority to Sartell's public safety. This new connection would greatly increase emergency response time and the safety of the public while responding. Please highly consider helping us to provide increased safety to our community by providing an excellent solution to this rapidly growing problem.

Sincerely,

Peter F. Kedrowski

Fire Chief

October 2021

To Whom It May Concern,

The purpose of this letter is to enthusiastically express support for the City of Sartell to connect 19th Ave. North to Pinecone Road. This would be accomplished by constructing a thoroughfare, 15th Street North.

The rationale behind our support of the project involves safety, efficiency, and cost savings. Currently, our school buses have to navigate south through high-capacity residential areas in order to transport students to their school sites in the northern portion of the district. With finite financial resources and the increased cost of fuel, this burden has become significant. In addition, students are asked to ride on longer bus routes and this is especially true of our students who reside in rural areas who experience routes that are significantly longer than otherwise necessary.

In closing, I sincerely thank you for your consideration of this project and share support of myself and our School Board for the construction of 15th Street North.

Kind Regards,
